CENTRAL INTELLIGENCE AGENCY

WASHINGTON 25, D. C.

OFFICE OF THE DIRECTOR

24 September 1965

Brigadier General Harry L. Evans  
Assistant Deputy Commander for Space  
for Manned Orbital Laboratory  
Headquarters, Air Force Systems Command  
Andrews Air Force Base, Maryland

Dear General Evans:

In reviewing my needs for assistance from outstanding individuals who are not full-time members of the U. S. intelligence community, I have determined that it is essential that I form a Space Intelligence Panel reporting to the Director of Central Intelligence. A similar panel has existed for a number of years and made a continuing contribution to our understanding of Soviet strategic weapons systems.

It will be the function of the Space Intelligence Panel periodically to examine all available intelligence data bearing on foreign space programs and to advise me on the significance of such developments. These same results will be made available to the USIB. This counsel will be most helpful in framing our National Intelligence Estimates, for which I bear final responsibility. I would also hope that this panel would examine our collection and analytical resources and advise me as to their adequacy. The panel would normally meet twice a year for several days so as to keep abreast of new developments in foreign space programs. Members will serve for defined, overlapping terms so as to ensure appropriate continuity.

APPROVED FOR RELEASE  
DATE: JUL 2004

~~SECRET~~

The status of Soviet plans to land a man on the moon in competition with Apollo is now very much on everyone's mind, and I hope that an early first meeting of the panel will focus on this problem.

Dr. Simon Ramo has accepted my invitation to chair the Space Intelligence Panel. I should like to ask you to serve as a member of this panel for the next two years, so as to make your unique experience in our own space programs available to the national intelligence effort. We hope that you will find it possible to accept this responsibility. My Deputy for Science and Technology, Dr. Albert Wheelon, will contact you and the other members so as to set an early date for this examination.

Sincerely,

W. F. Raborn  
Director
